

Bonaire, N.A. 2008 Trip: Saturday, 12 July through Saturday, 19 July 2008

Join New Horizons and Caradonna Dive Adventures on their annual expedition to Bonaire, N.A. (Netherlands Antilles). This diver's paradise has been consistently the top dive destination in the Caribbean for many years due their ecological approach to diving - The entire island is one big marine park! Join the Staff of New Horizons as we lead this adventure, and allow us to introduce you to the many underwater and land-based activities this island has to offer: Exotic dive locations all over the island, wind-surfing, kite-boarding, snorkeling at Lac Bay, and of course, blo-karting on the world's largest purpose-built track for these land sailing machines. During those surface intervals, enjoy some of the best food you will ever experience, and save room for the key lime pie at the Lions Den restaurant!
